

Cancer Networks In England

May 2002

Introduction

This pack contains summary information on the 34 cancer networks in England. The information has been validated by each cancer network and gives contact details and Trusts within each network. Strategic Health Authority and Primary Care Trust information will be incorporated to the document in late 2002. The document will be regularly updated to take account of changes in network personnel and organisational composition. To that end networks are asked to inform the Cancer Action Team of any changes. Over time the intention is to expand the database to include voluntary sector organisations and primary care cancer leads as they are appointed.
